

Refill Instructions for HP 62 – 300 - 301 – 302 – 303 - 304 – 305 - 901 Colour Cartridges

Fit the cartridge into the refill Clip as above. Use a sharp knife to lift an edge of the top label and peel it off, as shown in image 1 above. Attach the syringe handle onto the colour you wish to refill. Take great care when doing this, put your thumb on top of the coloured stopper first before attaching it. Then remove the stopper and fit a needle.

Refill ink into the hole in the centre only as shown image 4 above.

After refilling all three colours with the cartridge fitted into the priming clip take the small syringe in the kit – look at the underside of the clip – fit the small syringe into the hole and use it to suck a small amount of ink through the print head.

Great care must be taken to check the positions for the inks. We became aware that HP vary the positions of the Magenta and Yellow chambers between starter cartridges and ones that are purchased normally.

One way to make certain of the orientation the colours in your cartridge, is to take a clean needle – insert it into one of the holes (as shown above), withdraw the needle and wipe it on a piece of clean tissue

This also removes any air pockets and ensures that ink has travelled all the way through the nozzles in the head.

Remove from clip and gently wipe the print head with paper tissue / towel – fit back in the printer and run a test print. The above two images show how HP have reduced the size of the sponges inside the Standard size Colour cartridge (on the left). This means that it simply cannot hold as much ink as the “XL” version (on right)

Cartridge Data

The Ink Volumes as supplied in HP cartridges are shown for information purposes only.

HP 301 used in:-

HP Deskjet 1000 / 1010 / 1050 / 1050A All-in-One / 1510 / 1512 / 1514 / 2050 / 2050A / 2050s / 2510 / 2512 / 2540 / 2542 / 2544 / 2549 / 3000 / 3050 / 3050A / 3055A e-All-in-Ones
